

Norwegian Alpine Ski Team on tour with **Swiss DolorClast®**

Since 2006, the Norwegian Alpine Ski Team is travelling from competition to competition with the Swiss DolorClast® on board. The athletes and their medical attendants believe in the efficacy of the Swiss DolorClast® Method. It's not unusual that some of the athletes are travelling several hundred kilometres to get a shockwave treatment while being in preparation for the next season. Of course, they choose the original: the Swiss DolorClast®.
