2nd ATRAD WORLD CONGRESS
ON RADIAL SHOCK WAVE THERAPY

OCTOBER 30, 2010 IN BERLIN

-
- | | |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2:15 PM – 3:00 PM | Radial shock wave therapy to treat idiopathic lower back and cervical pain Dr. Nick Boden (Kuala Lumpur, Malaysia) |
| 3:00 PM – 3:45 PM | Radial shock wave therapy to optimize the performance of professional athletes Speaker to be announced |
| 3:45 PM – 4:15 PM | Coffee break |
| 4:15 PM – 5:00 PM | Radial shock wave therapy to treat cellulite Dr. Kai-Uwe Schlaudraff (Geneva, Switzerland) |
| 5:00 PM – 6:00 PM | Emerging concepts in radial shock wave therapy Why do many patients benefit from radial shock wave therapy, but others do not ? Dr. Simon Locke (Brisbane, Australia) Similarity between results of prospective, randomized controlled clinical trials using radial shock wave therapy and in day -to-day clinical use Dr. Hervé de Labareyre (Paris, France) Use of radial shock waves for improved diagnosis of tennis elbow Dr. Bent Brask (Oslo, Norway) Treatment of idiopathic cervical pain with radial shock waves or a multimodal therapy approach – what is the better option? Prof. Dr. Jan-Dirk Rompe (Mainz, Germany) |
| 6:00 PM – 6:30 PM | Oral presentation of the best three posters Presentation of the poster awards Concluding remarks Felix Egloff (Zurich, Switzerland) Dr. John P. Furia (Lewisburg, PA, USA) |
| 7:30 PM – 11:00 PM | Social event |
