

>>> NEWS FLASH <<< Swiss DolorClast treatment for Argentina

The chances for other teams to win the World Cup are decreasing as Argentina will be the new favorite team thanks to a Swiss DolorClast treatment for Lionel Messi and Gabriel Milito.

Both players received their third treatment already and will be fit to play at the World Cup.

Lionel Messi – also called “the new Maradona” – might become one of the big shooting stars of this tournament. Two weeks ago it was not certain that he could play due to a muscle injury and a calcification. Thanks to DolorClast treatments in Argentina, Italy (thanks to Claudio Garlatti) and now Germany he was already back on the pitch this week.

We are in close contact with other federations and hope that we can tell you more of these success stories.

If Argentina wins the World Cup with Messi and Milito it might be also thanks to EMS...
